PHP: Hypertext Preprocessor PHP is a popular general-purpose scripting language that is especially suited to web development. Fast, flexible and pragmatic, PHP powers everything from your blog to the most popular websites in the world. Webserver directory index - Wikipedia When an HTTP client (generally a web browser) requests a URL that points to a directory structure instead of an actual web page within the directory, the web server will generally serve a default page, which is often referred to as a main or "index" page.. A common filename for such a page is index.html, but most modern HTTP servers offer a configurable list of filenames that the server can. Manual:Parameters to index.php - MediaWiki This page is a partial list of the parameters to index.php, the main script of the MediaWiki software.Most of these arguments are usually given as GET parameters in the URL, but can also be passed as POST data. POST is actually required in some cases, such as the purge action.

How to Redirect index.html to index.php | CSS-Tricks For a vcalendar install I found putting. DirectoryIndex index.php index.html index.htm. in the relevant directory made things work. i.e. index.php was made the default index (index.html was still needed for the calendar to function. PHP: Examples - Manual index.php in the top directory is the only way in of the application, you should rewrite all request to it(you can use .htaccess in Apache+php_mod. index.php | Drupal 7.x | Drupal API 7.x index.php The PHP page that serves all page requests on a Drupal installation. The routines here dispatch control to the appropriate handler, which then prints the appropriate page.

Facebook - Log In or Sign Up Create an account or log into Facebook. Connect with friends, family and other people you know. Share photos and videos, send messages and get updates. What is the purpose of the index.php file? - Joomla ... The index.php file is the skeleton of the website. Every page that Joomla! delivers is "index.php" fleshed out with a selection of content inserted from the database. The index.php file for a template contains a mixture of code that will be delivered as it is, and php code, which will be modified. Removing index.php from URLs â€" ExpressionEngine 4.3.6 ... 1. Create an .htaccess fileÂ¶. Using your FTP client, create a new file named .htaccess (including the leading dot) in the same folder as your siteâ€™s main index.php file.
